

## High Resolution & Productivity

The Seiko ColorPainter stands for high resolution and productivity among Wide Format digital printers. The basis of this success was the usage of the Konica print head which permits both highest sharp-edged detail printing as well as extraordinarily strong solid-area prints. Thanks to the outstanding market acceptance, the Seiko ColorPainter was also available as OEM product by HP.

Mara<sup>®</sup> Jet DI-CP was especially developed for the "Seiko ColorPainter" series and scores with brilliant colour shades and an excellent colour gamut. Its exceedingly reliable printability during fast printing speeds and the fast drying properties allow highest productivity.

### Applications

Mara<sup>®</sup> Jet DI-CP is suitable for printer models employing Konica print head technology such as

- Seiko ColorPainter W-series
- HP DesignJet 8000

Substrate Range	
PVC self adhesive films	✓
PVC coated substrates	✓
Coated/uncoated textiles	✓
Suitable papers	✓

### Your Benefits:

**Brilliant colour shades, especially reds and greens**

→ High colour density offering a wide colour gamut

**Very fine, variable ink droplet sizes**

→ Excellent dot definition, detail reproduction, and image quality

**Fast drying**

→ For high printing speeds

**High-quality pigmentation, excellent light fastness**

→ Best suited for outdoor applications

**Very good scratch resistance**

**Compatible Bulk System BS-SW available**

→ Easy to handle, highest printing stability
