

Achieve the Ultimate Result with UV or LED Technology

Ink jet printers offer new opportunities when it comes to versatility and print quality, and yet only with the right ink can you create the perfect result. With the high print quality and wide colour gamut along with the flexibility to print on rigid and flexible substrates the Ultra Jet DUV-MF (UV Curable) and Ultra Jet DLE-MF (LED Curable) gives you the power to easily turn your ideas into high-level products!

Applications:

The UV-curable Ultra Jet DUV-MF is suitable for printers and printhead technologies like:

- Flora PP2512UV (Konica Minolta)
- Agfa Anapurna (Konica Minolta)
- Handtop(Ricoh Gen 5)
- SwissQprint (Konica Minolta)
- EFI Vutek (Seiko)

The LED-curable UltraJet DLE-MF is suited for printers and print head technologies like

- Mimaki UJF-3042 (Ricoh Gen 4)
- Fjet/Xjet (Ricoh Gen 4)
- Mimaki JFX200, JFX500(Ricoh Gen 5)

The Ultra Jet DUV-MF and Ultra Jet DLE-MF substrate range includes:

- Rigid materials like acrylics (PMMA)
- Rigid PVC
- Aluminium composite panels (like Dibond®)
- Polycarbonate
- Pre-treated polyethylene & polypropylene
- Flexible substrates like self-adhesive films, or PVC banner material
- Printable fabrics such as Trevira®, and artificial leather

Your Benefits:

Adheres well to a wide range of substrates

- Suitable for PMMA, PP/PE, PC, PET, Glass (with P4 Primer)

Very well suited for hybrid machines

- With both Roll to Roll and flatbed options

Developed for high-resolution print heads

- Allows repeatable, photo-realistic prints

High-grade pigmentation

- For long-term outdoor use

Made in Germany

- Developed and produced under strict tolerances to ensure highest quality
