

Harmonization of formulations

Owing to an alignment of formulations and raw materials, some formulations among the Ultra Glass UVGL ink series will be slightly adjusted. The proven properties remain unaffected.

Continuous product maintenance has led to a harmonization within the Ultra Glass UVGL range in terms of raw materials and formulations. Extensive print tests have confirmed that the product properties remain unchanged. The cured ink film has the familiar properties and resistance, e.g. in terms of adhesion and chemical resistance.

The following products are affected:

- UVGL 136
- UVGL 162
- UVGL 170
- UVGL 180
- UVGL 188
- UVGL 913
- UVGL-PG
- UVGL-PS

For further information on Ultra Glass UVGL please refer to www.marabu-inks.com

Date of change-over

The different colour shades will be adapted **gradually**, presumably within the first half of the year 2021. The change can be identified by the additional label:

„Attention: Modified Formula“
